

The OR-444, ORCA Spinal Support System (3S)

MODEL: OR-444

The OR-444, ORCA Spinal Support System, 3S, is a patented design to help protect and support the audio operators while working outdoors.

Our number one goal is to help the operators support their back after many years of carrying heavy equipment. The 3S Harness comes in one size that fits most.

The 3S features:

Modular - Can be used with just the waist belt, the top vest, the waist belt with top vest or all combined with the patented Spinal Support System.

Ventilated - The Harness is built with a special 3D EVA sponge and mesh system, for maximum air flow and ventilation.

Roller buckles - The 3S waist belt, has two unique "rollers buckles" that help tighten the waist belt on the user's hips for perfect fit and weight distribution. The waist belt thigh system is a one of a kind, unique design for ORCA Bags!

Adjustable Spinal Support System - The unique patented Spinal Support System has a special pneumatic and spring system that helps the users adjust the height of the harness spine as needed. The OR-444 comes with two back pockets and USB portal with built in cable.

Modular

Height	Internal: Cm/Inch	Weight Hg/Lb	Spinal System Height	
OR-444	L: 77 cm /30.31" W:67cm/26.37"	1.550Kg/3.417LB	Min: 40Cm/15.74"	Max: 54cm/21.25"
